### TOP TECH SKILLS

- Node.js
- NestJS
- JavaScript
- React
- GraphQL
- PostgreSQL
- MySQL
- MongoDB

### EXPERIENCE

#### HighLevel, Remote - Senior Software Engineer

FEB 2021 - PRESENT

- ❑ Crafted a payment flow architecture that enables us to efficiently integrate new payment providers into our system with minimal disruption. As an example, successfully integrated the NMI payment provider into our system in under a week by rapidly understanding and utilizing their APIs. This showcased the agility and effectiveness of our payment flow design.
- ❑ Developed a npm package for a payment element component that determines which payment provider SDK to load based on the settings & seamlessly handles the payment. This significantly streamlined the integration of new payment features and eliminated redundant efforts for other teams.
- ❑ Designed a versatile recurring trigger system that can be leveraged to build various other recurring functionalities. As an example, implemented recurring invoicing with auto payment and created an in-house subscription system, similar to Stripe's model, for Authorize.net and NMI payment providers.
- ❑ Mapped out and integrated Stripe transactions and subscriptions across multiple features, including order forms, calendars, invoices, and text2pay payments.
- ❑ Created a comprehensive monitoring dashboard to proactively identify and resolve critical issues before customers reached out.
- ❑ Developed an internal product store that integrates with our payment integrations and enables us to sell products through order forms.

#### Bank Novo, Ahmedabad - Full Stack Developer

DEC 2018 - FEB 2021

- ❑ Designed a secure and scalable React-based web application that offers comprehensive banking services.
- ❑ Collaborated with various internal stakeholders (Product, Growth, NRD, and CS) to develop execution plans for new features, and executed the development of both front-end and back-end functionality.
- ❑ Built multiple features aimed at reducing fraud and enhancing authentication flows.
- ❑ Enhanced the codebase of our existing applications, specifically with React and GraphQL.
- ❑ Implemented user and system action tracking using Segment to provide insightful data to internal stakeholders for better decision-making.

## **Gridle, Ahmedabad** - *Software Engineer*

MAY 2018 - DEC 2018

- ❑ Developed UI/UX (using React) and API (using Django) for “Money Planner” (Fintech product of Aditya Birla Capital) from scratch.
- ❑ Responsible for scope out the feature implementation with the product manager.
- ❑ Mentored interns and freshers in all teams & also helped to take any tech decision or solve problems.
- ❑ Managed devops services of AWS like EC2, SES, S3.

## **Gridle, Ahmedabad** - *Software Engineer Intern*

NOV 2017 - APR 2018

- ❑ Learned React, Redux & Laravel and developed the complete product “Mechhub” (Marketplace for Mechanics) as a team of 2 interns.
